### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed subject matter in claims 1-20 is allowable because the arts of record fail to teach or fairly suggest the claimed "a baud-timing recovery system and method (in claim 9) for recovering timing information from the transmitted signal comprising:

A timing error detector having a first and second inputs (see first and second inputs to timing error detector 120 from the feed forward and feedback equalizers in figure 4) and an output, the first input coupled to the first output of the DFE and the second input coupled to the second output of the DFE, the timing error detector operative to provide at the output a signal that includes a ratio of the first (see divider 140 of 120 phase error detector in fig. 7 receiving the  $W(N-1)$  from the first DFE100) and a second inputs (see second input  $W(N-2)$  from the second DFE to the phase error detector 120 to be divided by the divider 140 in fig. 7), wherein the signal is representative of the timing error reflected in the sampled transmitted signal, the signal at the output of the timing error detector being used to drive the clock signal at the second input of the sampler (128); in combination with the claimed sampler and DFE in claims 1,9 and 15."

2. See also Applicant's amendment (ratio of the first and the second inputs from the DFE equalizers) argument in response to the first office action

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
